

Article 8

Fund incorporating sustainability criteria

Active management across a broad universe of bonds, while maintaining an investment grade rating

The fund invests across all liquid segments of the credit universe, while maintaining an average Investment Grade rating for its portfolio at all times. Management is active and combines a top-down approach to favour the most promising segments with a bottom-up approach to bond selection, based on our in-depth credit analysis expertise. Anaxis Strategic Bonds offers investors a performing and robust investment solution as a core fixed-income allocation.

Fund strategy

- A broad investment universe comprising vanilla corporate bonds, hybrids and subordinated financial bonds.
- The bond selection is based on in-depth fundamental analysis of each issuer.
- An active management of the bond allocation and of interest rate and credit sensitivities, considering our macroeconomic and relative value analyses. Use of derivatives to manage risk and performance.
- The portfolio maintains an average Investment Grade rating at all times.
- The fund incorporates sustainability criteria into its bond selection, particularly in terms of environmental and governance factors.

Integration of sustainability criteria

- Our commitments include protection of the environment and biodiversity, the preservation of water resources, a contribution to ecological transition, an improvement in population health outcomes, and respect for universal ethical standards.
- We exclude the most harmful sectors on the basis of four criteria: greenhouse gases, pollution, healthcare and ethics.
- We avoid indirect financing of the activities of authoritarian governments through bonds issued by state-owned companies in these countries.

Current Yields

These figures will evolve according to the investments made, to the active management of the fund and to market conditions.

Portfolio allocation

Advantages of the fund

- Bond management with a broad investment universe.
- A proven bond selection process based on rigorous fundamental analysis.
- Active management to favour the most promising segments while maintaining adequate diversification.
- Use of derivatives to effectively manage risk allocation.
- A portfolio with an average rating of Investment Grade at all times.
- EUR, USD and CHF share classes fully hedged available.
- Accumulation or distribution share classes.

Main risks

- Risk of capital loss.
- Credit risk. This is the potential risk that the issuer's rating be downgraded which may lead to a decrease in the price of the security and thus the fund's net asset value. Furthermore, subscribers should note that investments in low-rated or unrated securities generate higher credit risk.
- Interest rate risk.
