Building a serene future

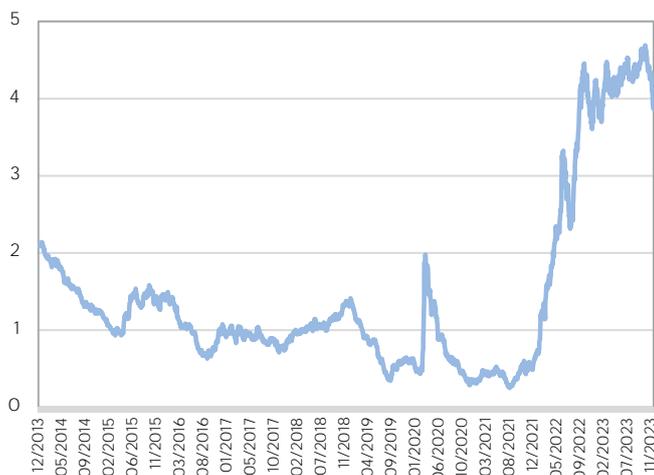

Locking in attractive yields on IG for the next few years

The sharp rise in interest rates in recent months has led to a return to attractive yields on Investment Grade. However, with inflation moderating, this policy is coming to an end, with the first rate cuts. For investors willing to commit to a time horizon ending 31 December 2030, Defensive Bond Opp. 2030 offers the opportunity to lock in these historically attractive yields over a long horizon.
