Fund targeting sustainable investment activities

### Seeking additional yield and diversification

In a context of uncertainty regarding the evolution of growth, inflation and interest rates, EM Bond Opp. 2028 offers opportunities for higher yields than developed market corporate bonds and diversification of bond portfolio, for investors prepared to accept the risks inherent in EM corporate bonds over an investment period ending on 31 December 2028.

### Fund Strategy

- Investment universe comprises EM bonds in hard currencies with principal repayment around 31 December 2028 (Fixed-term maturity fund).
- Corporate bonds from various credit ratings.
- Rely first and foremost on an extensive fundamental analysis of each corporate bond.
- Active monitoring and management.
- A strong sustainability policy to reduce risk and for ethical reasons.
- Favours issuers offering good visibility for a given credit rating / preference for less cyclical sectors.
- No investment in financial sector.

### A strict and ambitious ESG approach

- Our commitments include protection of the environment and biodiversity, the preservation of water resources, a contribution to ecological transition, an improvement in population health outcomes, and respect for universal ethical standards.
- Our portfolios adhere to the trajectory set out in the Paris Agreement.
- We aim for carbon neutrality in the portfolios by 2050, with a reduction in their carbon intensity of 60% between 2018 and 2028.
- We exclude the most harmful sectors on the basis of four criteria: greenhouse gases, pollution, healthcare and ethics.
- We avoid indirect financing of the activities of authoritarian governments through bonds issued by state-owned companies in these countries.

### Anaxis, pioneer and leader in fixed-term maturity funds

- History of 15+ years of performing and resilient investment solutions.
- 5 people team dedicated to corporate bonds.
- Pioneer in fixed-maturity funds and firm believer in the advantages of these funds:
  - Diversification
  - Thorough credit analysis of each bond
  - Visibility as credit and rate risks decrease over time

### Advantages of fixed-term maturity funds

### Allocation of the portfolio

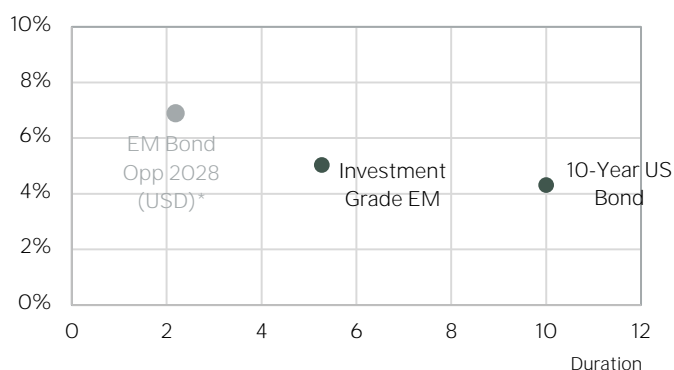

### Advantages of the fund

- Attractive yield in the current environment.
- Professional bond picking through thorough fundamental analysis.
- Diversification.
- Preference for sectors considered by the fund managers as less cyclical.
- Visibility as risk profile decreases over time.
- EUR, USD and CHF classes fully hedged available.
- Capitalization or distribution classes at choice.

### Characteristics of the fund

Legal structure	UCITS Fund
Liquidity	Daily
Maturity	31 December 2028
Management fees	0.75% (Institutional share classes) 1.25% (Retail share classes)
Entry / Exit fees	2% max. / 1%
Custodian	BNP Paribas SA
Auditor	PricewaterhouseCoopers Audit
AMF approval number	GP-10000030
AUM	80 million EUR

### Current Yields

### Main risks

- Risk of capital loss.
- Credit risk. This is the potential risk that the issuer's rating be downgraded which may lead to a decrease in the price of the security and thus the fund's net asset value. Furthermore, subscribers should note that investments in low-rated or unrated securities generate higher credit risk.
- Interest rate risk.
