

This fund targets at its 31st December 2027 maturity an annualised performance after fees above that of the performance of the German federal bond with maturity 15/11/2027 (I1 units - EUR). The investment strategy is based first and foremost on an extensive fundamental analysis of private-sector bonds including consideration of ESG criteria. The investment strategy aims to build a robust and diversified allocation based on the selection of individual bonds each for their own merits. The fund is actively managed but does not seek to capture short-term market trends.

The investment objective is conditional upon investment in companies which stand out for their active approach to sustainable development and their commitment to putting in place policies that are compatible with the issues at stake in climate-related and environmental regulation. The investment management activity aims to contribute significantly to the efforts required to achieve the long-term global warming objectives of the Paris Agreement. To this end, Anaxis targets a reduction in carbon intensity of the portfolio by 60% between 2018 and 2028.

Fund targeting sustainable investment activities

Monthly Comment

February closed on a highly uncertain note, marked by escalating tensions as the US and Israel launched attacks on Iran, risking a destabilizing regional conflict. Earlier in the month, volatility surged in credit markets amid investor concerns over the disruptive impact of AI on vulnerable business models, the US Supreme Court's invalidation of IEEPA-based tariffs, and heightened geopolitical risks in the Middle East. These factors drove defensive market positioning, with a bull flattening in both US (5Y yields down 28 bps) and German (5Y yields down 18 bps) curves. Investment-grade (IG) spreads widened by c. 10 bps (to 82 bps in Europe and 85 bps in the US), while high-yield (HY) spreads moved more sharply (Europe +10 bps to 274 bps; US +34 bps to 307 bps). Despite wider spreads, the rally in Treasury rates supported positive total returns for IG and HY indices, with IG outperforming HY and CCC-rated bonds ending in negative territory. In primary markets, February saw robust IG issuance offsetting lighter HY activity, while investor flows remained strong - particularly in US IG, Euro IG, and Euro HY segments. The European Bond Opp 2027 fund is up +0.33% in February (I1 class).

Corporate activity picked up in February in the short-dated segment of the fund, with four bonds being reimbursed. The cash proceeds were redeployed to increase exposure to various credits, including Eircom (telecommunications), Grifols (healthcare), RAC (commercial services), Telenet (telecommunications), and TeamSystems (technology). Risk aversion led the Investment Grade portion of the portfolio to outperform the High Yield bucket. Sector-wise, Technology suffered the most due to rising fears of AI substitution, while Transportation and Consumer were the main outliers.

Our ESG commitments

- Protecting the environment and biodiversity, with a particular focus on aquatic ecosystems
- Preservation of water resources
- Contribution to the transition to a carbon-neutral economy
- Improve people's health
- Compliance with universal ethical standards: human rights and UN Global Compact

Our ESG objectives

Alignment with the Paris Agreement to limit global warming:

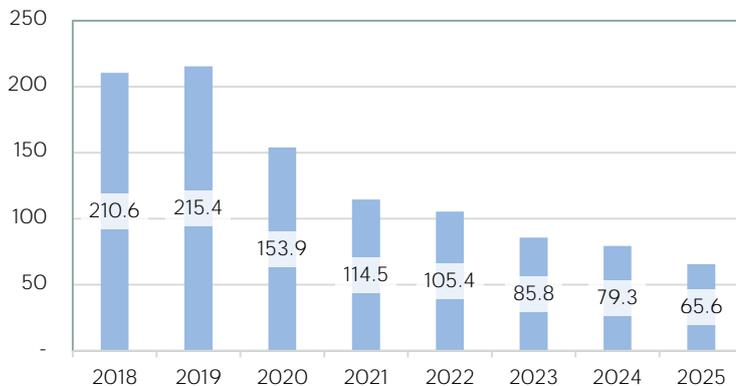

- Carbon neutrality of portfolios by 2050
- Emission intensity reduction by 60% between 2018 and 2028

Exclusion of the most harmful sectors with a policy based on 4 pillars:

- Greenhouse gas
- Pollution
- Health
- Ethics

Concrete results for portfolio decarbonization

GHG Intensity
t of CO2 equiv. per
EUR 1 million of turnover

Sector Contributions to GHG Intensity

February 2026

Fund GHG intensity 65.36

t of CO2 equiv. per EUR 1 million of turnover

Fund GHG intensity reduction -69%

compared to the reference date at the end of 2018

Net Zero share (carbon neutral) 5%

Share of issuers publishing emissions 66%

Strict environmental exclusions in portfolio

Share of coal	0%
Share of non-conventional fossil fuels	0%
Share of other fossil fuels	0%
Share in the development of fossil fuel projects	0%
Share of agricultural chemicals	0%
Share of tobacco	0%
Exposure to controversial weapons	0%
Exposure to conventional weapons	0%

Exclusion Thresholds

Fossil fuels: 5% of turnover / 10 million tons of coal extraction / 5 gigawatts in coal-fired power stations

Tobacco: 5% of turnover

Weapons: 10% of turnover

Controversial weapons: no tolerance

Other exclusions: 20% of turnover

Portfolio committed on climate, social & governance issues

Climate

Allocation to climate-sensitive sectors	5.8%
Green bonds	2.4%
Sustainability-linked bonds (SLB)	7.2%
Estimated share aligned with the European Taxonomy	4.3%
Share of renewable energy in issuers consumption	43.4%

Average climate rating of the portfolio

On a scale of A (best) to E (worst)

Average climate rating of climate-sensitive companies

On a scale of A (best) to E (worst)

Protection of water and biodiversity

Allocation to water-sensitive sectors	3.2%
Share with inadequate management of water-related impacts	0.8%
Share exposed to water stress	0.0%
Share with a significant negative impact on biodiversity	0.0%

Average water rating of water-sensitive companies

On a scale of A (best) to E (worst)

Social & governance

Exposure to issuers involved in human rights violations	0.0%
