

Climate action in practice

- We maintain **zero exposure to fossil fuel activities**, apply strict sector exclusions, and actively assess companies' transition strategies.
- As a result, **the greenhouse gas intensity of our portfolios has been reduced by 72% since 2019**, in line with our commitment to the Net Zero Asset Managers initiative and the objectives of the Paris Agreement.

anax 

Environmental responsibility beyond climate

- Our approach also addresses **biodiversity, water management, waste and pollution**, with reinforced vigilance on sensitive areas and high-impact sectors.
- We aim to **avoid negative impacts on biodiversity-sensitive areas**.

Strong social and governance standards

- **We apply stringent criteria on human rights and labour standards.**
- **We have no exposure to controversial weapons and companies in breach of UN Global Compact or OECD principles.**
